SUMMARY

Final-year Computer Science student with hands-on experience in full-stack software development using Java, Spring Boot, and MySQL. Seeking a Software Development Internship to apply backend and web development skills in a real-world environment. Developed an enterprise-style Employee Management System featuring workflow automation, reporting, and analytics. Passionate about building scalable, efficient, and user-focused applications.

TECHNICAL SKILLS

Languages: Java, JavaScript, HTML, CSS

Backend: Spring Boot, REST APIs, JPA/Hibernate, MVC Architecture

Frontend: Responsive Design, DOM Manipulation

Databases: MySQL, SQL (CRUD, Joins, Filtering), Database Design

Tools: Git & GitHub, Maven, NetBeans, Visual Studio Code, Postman

EDUCATION

Diploma in Computer Science

Feb 2023 - June 2026

Tshwane University of Technology (TUT)

- Final Year – Expected Completion: June 2026
-

PROJECTS

Employee Management System (Full-Stack Application)

GitHub: <https://github.com/mthokozisi-mtshweni>

Technologies: Spring Boot, Java 17, MySQL, JPA/Hibernate, JavaScript, Chart.js

- Developed a full-stack HR management system with employee CRUD operations, search, and filtering
- Implemented department, leave, and task management modules with workflow functionality
- Built reporting dashboard with data visualization and export features (CSV/Excel)
- Designed and implemented RESTful APIs using layered architecture (Controller–Service–Repository)
- Integrated frontend with backend services and ensured responsive design
- Managed version control using Git and GitHub

Web Application (Frontend Project)

GitHub: <https://github.com/mthokozisi-mtshweni>

- Built a responsive web application using HTML, CSS, and JavaScript
- Implemented dynamic content using DOM manipulation
- Applied clean code practices and structured file organization
